FIG. 55

FIG. 55 is a perspective view of a mechanical assembly. The assembly includes a circular component with a dashed line 'W' indicating a specific path or boundary. A bracket labeled '553' is positioned on the right side of the circular component, pointing to a specific section. The drawing includes several curved arrows indicating rotational movement. To the right of the circular component, there is a rectangular block with a smaller rectangular feature on its top surface. The entire assembly is shown in a perspective view.

FIG. 60

FIG. 60 is a cross-sectional view of a mechanical assembly. The assembly includes a base structure 772. A component 770 is positioned on the left, with a top surface 796. A component 775 is shown in cross-section, tilted at an angle θ relative to a horizontal reference line. A component 777 is mounted on top of 770. A component 776 is positioned between 777 and 772. A component 774 is shown in cross-section, with a width dimension W and a thickness dimension S . A component 771 is shown on the right side of the assembly. A dashed line indicates a hidden feature within the base structure 772.
